EXPERIENCE

Full Stack Developer

- Developed StrayHelp, a MERN stack web application that allows users to report stray animals with images, level of urgency, and location; facilitated NGOs to view, sort, and manage the rescue listings.
- Implemented RESTful APIs, real-time sorting/filtering based on locality and type of animal, and NGO dashboard with rescue management and deletion capabilities.

PROJECTS

1. Stray Connect | Node JS, Express JS & Mongo DB   **December 2024**
- Created an intuitive platform empowering NGOs access reliable data on stray animal incidents and enabling users to report them efficiently.
- Crafted dynamic and responsive interfaces using EJS templates, developed RESTful APIs for data handling, and ensured full responsiveness for accessibility across all devices.
- Implemented intelligent search and advanced filtering capabilities for efficient data access.

2. Upper Body Exercise Tracking System | Python & MediaPipe   **February 2025**
- Built a real-time computer vision solution for posture tracking to track upper body workouts like bicep curls, lateral raises, and shoulder presses.
- Calculated joint angles to detect improper form and provided instant feedback for posture correction.
- Enhanced workout accuracy by applying computer vision and lightweight neural tracking models.
